

Email

The University uses email as a prime method of communication with students, they know you have an email address because they gave you one when you enrolled, if you prefer to use another email address you can forward your mail. Click on the Email link.

Our email is provided by Microsoft Office 365, which includes access to the complete office suite for free, for download to your PC or Mac, as an online app, or for mobile devices... including Outlook an email client.

The "Free Software" email has more details, but you can also find out about Office 365 stuff through the "Email" link.
