INM307 Information Resources and Documentation Assignment
Introduction

This guide contains a collection of resources on an introduction to the Greek myths and ancient Greek culture. It is intended for teachers and student teachers who are working in primary education in all local authority maintained schools in England. The guide is designed to support the education of 7-11 year olds who are being introduced to Greek mythology and the study of ancient Greek culture through subjects such as English and History at Key Stage 2 (Years 3-6). Many of the resources are also suitable for home use by the pupil, but this selection is left to the discretion of the teacher.

The resources included in this guide are organised into lower Key Stage 2 (7-9 year olds), and upper Key Stage 2 (9-11 year olds). When a resource is appropriate for both lower and upper key stage 2 it has been included twice. The resources are also organised into 3 colour-coded categories. The first category is intended for sole use by the teacher and student teacher and is coded blue. The second category is intended for teaching in a classroom or workshop, or for a presentation or exhibition and is coded green. The third category is intended for classroom use and for home use by the pupil and is coded yellow.

The guide contains physical resources such as books and museums; and online resources such as webpages, videos and audio clips. All online resources are freely accessible, but physical resources such as books would need to be selectively purchased, and not all exhibitions are free of charge. It is hoped that this guide will support the teacher and encourage the pupil to continue developing an interest in the Greek myths and ancient Greek culture at later key stages in their education.

In the Greek myths, Atlas bore the weight of the heavens on his shoulders, a punishment given to him by Zeus for leading the Titan rebellion against the Olympians. (Image courtesy of Skeptacular via Pixabay)
In Greek mythology, the Trojan horse was given to the Trojans by the Greeks. It had the appearance of a gift but was really a war strategy. (Image courtesy of FCIT)

Reflection

My intention was to create a guide that could be legitimately incorporated into subjects taught in the National Curriculum in England and is intended for teachers and student teachers. I decided to prepare a guide to information resources on the Greek Myths and ancient Greek culture because it is a subject that interests me, but also a subject that I have limited knowledge of. Although I experienced recurring doubts that I do not have the authority to construct a guide on this subject because I do not have any expertise on ancient Greece, or experience of teaching in the education system in the UK, I felt that if I kept within the parameters of learning resources that have already been designated as Key Stage 2 or are age appropriate, then I would be able to stay on target for producing a legitimate teaching resource.

I was inspired to undertake this project after reading an article in *The Telegraph* about Carnegie Medal-winning author Kevin Crossley-Holland who has been advocating for two decades that children should be taught a careful selection of the Greek myths in school. Crossley-Holland believes that myths and legends are models for transmitting values and virtue by stealth, in which the principles of right and wrong behaviour are revealed, rather than stated (Furness, 2013).

My original idea was to produce a resource guide that supported the education of children who are studying ancient Greek culture within subjects such as English, History and Drama at Key Stage 3, and for young adults who are studying for a GCSE in Ancient History at Key Stage 4. However, I soon discovered that in local authority maintained schools in England, learning about ancient Greek culture is not compulsory after Key Stage 2 of primary education, and the majority of state-funded schools do not teach this material at all at Key Stage 3 in secondary education. This is in stark contrast to most grammar and independent schools that teach ancient Greek culture as part of Classical Civilisation and Ancient History throughout the entirety of secondary education. It quickly became apparent that the relationship between the subject I had chosen and the education system in England is somewhat politically-charged.

With this in mind I decided to reconfigure my original idea to focus on Key Stage 2 resources, and still follow my original intention to create a guide that could be legitimately incorporated into subjects taught in the National Curriculum in England. For the programme of study for English in Years 3 and 4, the National Curriculum guidelines state that pupils should be made aware of the ‘the triumph of good over evil’ (Department of Education, 2013, p. 26); and for Years 5 and 6, pupils should be familiar with myths ‘from other cultures and traditions’ (Department of Education, 2013, p. 33). In the programme of study for History at Key Stage 2
the guidelines state that pupils should be able to understand the legacy of Greek culture and ‘their influence on the western world’ (Department of Education, 2013, p. 5).

Although I did not adapt any existing guides for this project, I did include and extend the web resources from *An Introduction to Greek Mythology* (Mensa for Kids, 2019), and this teaching resource became the starting point for my assignment. For the construction of the guide, although there is a vast amount of information on the Greek myths and ancient Greek culture available on the Internet, I only included educational resources that are already associated with the teaching of this subject at Key Stage 2, or other high-quality information resources that are also considered reputable. To fulfil this second criteria, I only included material that is either well-established, or recommended by other Key Stage 2 resources. As is the case with history information, a selection of the resources are traditional in nature, with an emphasis placed on memory institutions, but because the Greek myths and ancient Greek culture are also taught in primary education, there are a lot of modern resources also included such as websites, videos and audio clips. I have included a selection of primary and secondary resources as both are important to teachers and student teachers seeking information in this domain.

Through my research I discovered lots of subscription sites with downloadable teaching materials, but I wanted to provide access to resources without having to login as a member to a paywall or free site. I wanted all the downloadable materials included in the guide to be both immediate and free of charge, so I excluded resources that utilised paywalls or sites such as TES that offer free membership after completing an online registration. However, there was one exception from TES that I was reluctant to exclude because it is such a high-quality and detailed teaching resource that is available to preview, so I have included it here:

**The Labours of Heracles texts and pictures** by J.M. Powell (TES)

*Source Type: Webpage*  
*Category: Classroom use*  

An online resource on the 12 Labours of Heracles that is available to preview and can be downloaded after registering with TES. The work is under a Share-alike Creative Commons license which means that the document can only be shared in its original version and not edited or remixed in any way.

With regards to the presentation of the guide, I was influenced by the black and reddish-orange colours of ancient Greek pottery, but also by the aesthetic of lined-paper to frame each annotated resource, in keeping with the theme of note-taking and learning. The guide
is divided into sections based on physical and online learning materials, but I also wanted to organise the resources in a way that would assist the teacher and student teacher in the different ways that the guide can be used. I decided to use the colour-coded scheme of blue, green and yellow for clarity and simplicity and also included the subheadings of ‘Source Type’, ‘ISBN’ and ‘Category’ for identifying more specific information within the colour-coded schemes. As the guide is intended to encourage browsing and exploration of the resources, I think it is best presented online although it is still usable as a printed hard copy. I have included working hyperlinks that have been ‘live’ for a long time and will hopefully continue to be so. I have thoroughly enjoyed creating this resource guide and the experience has taught me a great deal about the importance of resource guide creation, and the ongoing relevance of the Greek myths and ancient Greek culture in our modern world.
