“The summer school tutors include renowned architects, engineers, historians, academics and researchers with varied cultural and international backgrounds.”
10th July to 24th July 2016

6th International Architecture Summer School
Sustainable Energy & Building Technology: Resilient Architecture

The Lincoln School of Architecture is located in one of the most historic cathedral cities of Europe and sited in a purpose-built facility designed by the world-renowned architect Rick Mather. The School offers a dynamic, multidisciplinary environment founded on the research and consultancy interests of its academics and practitioners.

This year’s Summer School has an interdisciplinary approach between Architecture and Engineering focusing exclusively on Sustainable & Resilient Architecture: Low Carbon Communities, in the context of carbon management and energy use in the built environment. The 15 day International Summer School has been extremely successful for the last 5 years and offers a unique knowledge & cultural experience, delivering a combination of inspiring lectures, project work and workshops. The summer school includes field trips and visits to some of the best UK cities including London as well as sports, social and cultural events.

Who should attend? The Summer School is open to participants from all over the world, offering a unique learning experience to current students and recent graduates with an interest in design and engineering, sustainable architecture, sustainable urban design and the built environment.

The Summer School fee is £1,200 and needs to be paid in full before the summer school starts in July 2016. Fees include course materials, field trips, accommodation in the University student village (single ensuite) and sightseeing trips, welcome event and Gala dinner. Breakfast and lunch vouchers will be included from Monday to Friday when on Campus. Contact IBEX UK for knowledge and Culture Exchange for group discounts.
