

GROW WITH US

Public Health 3 month Graduate Placement

We are a small team with a Director of Public Health, Consultant in Public Health, and a range of intelligence and research staff working to support Public Health and NHS outcomes in North East Lincolnshire

What degree subject would this placement suit?

- ◆ Any social science degree
- ◆ Any health related degree
- ◆ Graduates with other degrees and a passion for the subject area will also be considered

What sort of person would suit this placement?

Someone who is interested in population health and/or social policy and research. Also someone who can work on their own and as a part of a small team. A high standard of interpersonal skills are required as the role includes working outside of the team with partners involved in the health and well being of the population.

What projects will I be involved in?

A range of public health programmes by agreement between the line manager and the successful candidate. Further detail will be provided to the successful candidate

What work will I be undertaking?

- ◆ Anything from evaluating breast feeding peer supporters work, needs assessments on mental health/older people/pharmacies, immunisation and screening programmes, smoking in pregnancy
- ◆ Analysis and reporting on statistics
- ◆ May also be opportunities to carry out an individual piece of research
- ◆ There will be opportunities to shadow the Director of Public Health
- ◆ The programmes of work will be tailored to suit the interests and aspirations of the successful candidate
