

JORGE COLOMBO

<https://www.thejorgecolombo.com/>

Jorge Colombo has worked as an illustrator, as a photographer, and as graphic designer for over 30 years. He's best known for the digital images he's been doing since 2009 (initially finger-painting on an iPhone; currently using an Apple Pencil and the Procreate app on an iPad Pro.)

WORK I LIKE

Jorge Colombo is an illustrator we had previously talked about in class. His work really caught my eye. The ability to tell a whole story in a mere few lines. I use my iPad to illustrate quite a bit, so seeing how he uses it inspires me. I like the imperfect strokes and the monochromatic colour palettes.
