

P7 have a busy term ahead with preparations for Christmas and various events.

### Literacy

Children will be reading a graphic novel in a literature circle this term. This will involve looking at different features of a graphic novel and discussing the structure and setting of the story. In Writing the children will be using information they have researched in our World War 2 topic to create different types of reports. Later on this term the children will have to prepare a short personal talk at home to present to the class.

### Numeracy

In Numeracy children will be developing their knowledge and understanding of fractions through written, practical and computer based activities. Through weekly mental maths tasks, they will continue to develop strategies and revisit different aspects of both numeracy and maths. The children will also be gathering, presenting and analysing data in different ways in Maths e.g. line graphs and pie charts.

### Health & Wellbeing

To promote a positive approach to mental health and emotional well being both classes will be participating in a 5 week programme called 'Headstrong' led by the school nurses. The children will also continue to develop their resilience by working through the 'Bounceback' programme.

Towards the end of this term the children will visit the Risk Factory where they will learn how to identify situations where their Health and Wellbeing is likely to be compromised and have the confidence to make decisions about their personal safety.

### Other Areas of the Curriculum

Children will be using primary and secondary sources to research World War 2 to develop their understanding of sequence and chronology and will learn about the short and long term effects of conflict.

In Art, alongside working with our Art specialist teacher, children will explore different paper sculpting techniques in class.

### Citizenship Groups

This term children have chosen a Citizenship Group to be part of. These groups help children to develop awareness of individual, school, local and global needs. They will use their initiative and creativity to find solutions to problems, develop skills for life and/ or make a contribution to help others.

### Christmas

Our Christmas festivities are currently being scheduled. Please keep an eye out for further information closer to the time. We look forward to seeing you then!
