

In my Garden...

Intended Learning Outcome:

I can help collect and display objects by type.

I can talk about the information that has been collected and displayed.

Activity:

Spend some time watching for birds either from in your garden or from a window. Make a tally chart of how many different birds you can see. Can you see more than one kind?

Which did you see most of? Which did you see fewest of?

Intended Learning Outcome:

I can use a variety of sources to find out information about new things.

Activity:

Use the internet to help you find the names of the different birds you saw.

Intended learning outcome:

I can use language for a variety of purposes.

To:

- Describe
- Explain
- Ask questions
- Give relevant answers
- Share experiences

Activity:

Have a bug hunt in your garden. How many different kinds of bugs can you find? Do they have legs? How many?

Intended learning:

I regularly take part in physical activities which help me develop control of my body and increase my agility skills.

Activity:

Pretend to be the bugs you found in the garden, move around like them. Try crawling, scuttling, wriggling and jumping around in your garden.
