

# SEVERE WEATHER PLANS

## IN PRIMARY 1

### Phonics & Reading

- Practice forming some of your sounds on a piece of paper. You could rainbow-write them in different colours across the page
- Use your sound cards from our Home Learning to practise Fred Talking and blending some CVC words

### Numeracy and Mathematics

- Log in to Lumio and practise some number counting games
- Draw a picture of what you can see out of your window using lots of different shapes – circles for car wheels, rectangles for tree trunks, squares for houses etc

### Expressive Arts

- Use recycled items from your house to make a junk model. You could use toilet roll tubes to make a rocket, cardboard to make a treasure chest. Be creative and bring your learning into school to share with your class!

### Health and Wellbeing

- Think about a time when you were a good friend to someone. Draw a picture of what you did to be kind and label who is in your picture.

Don't forget to Tweet your learning throughout the day! @stdavidsprimary
