

SEVERE WEATHER PLANS

IN PRIMARY 7

Literacy and English

- Write a poem about winter weather. Ensure you include the following vocabulary: frost, winter, breeze, silence. This could be a haiku, acrostic poem, limerick or include simple rhyme. Proof read and redraft your work.
- Select an interesting article from Newsround. Listen, watch and write notes detailing key information. Create a short news report (written or filmed).

Numeracy and Mathematics

- Write three tricky questions to challenge one of your peers. Tweet these and await a response!

RE

- Visit <http://www.wednesdayword.org/home/childrens.htm> and watch some short videos/ read some of the interesting fact files about key figures of the church. Create a short fact file to demonstrate your learning. You could include a word search or mini quiz!

Expressive Arts

- Sit at a window in your home. Sketch using pencil a 'Cold Winter's Day' to illustrate your surroundings.

Science

- Fill empty containers with warm water and leave outside in the freezing conditions! Try to do this with different shapes and sizes. Observe the changes throughout the day and document

these. Note the difference in time for smaller and larger items to freeze. Tweet pictures of your experiments. The most creative frozen 'sculptures' will win a prize!

Health and Wellbeing

- Consider your JASS Award. Create a flow chart/ mind map to represent your progress to date and next steps.
- Consider 'Our Learning Powers'. Think about how you use them to support you at home. Create a picture which illustrates this.

Don't forget to Tweet your learning throughout the day!
