Using Venn diagrams

Venn diagrams show the relationships between a collection of things (numbers or objects, for example) in a logical way.

The numbers in the left circle follow one rule; the numbers in the right circle follow another rule. The numbers in the middle follow BOTH rules.

Can you sort these numbers into the Venn diagram below?

**Answers:**
- 5, 25 and 15 in the left hand circle.
- 12 in the middle.
- 10 in the right hand circle.
- 13 on the outside.
