

NAME: _____

HR: _____

In S2 you will be have the chance to study one of our S2 Electives for 2 periods per week. This is an opportunity to study differently in an area you are interested in, which will build your skills and knowledge whilst working with others. There is a focus on employability skills and introducing you to areas of study you may wish to continue with as you move through the school.

Please indicate your **1st, 2nd and 3rd choice** of Elective in the box to the right of the description. It cannot be guaranteed that all courses will run until pupil choices have been made. Please remember to sign and date the sheet once you have made your choices and return the form to your **Head of House or PT Tracking and Monitoring by Monday 21st January.**

<p>Caring for Horses (12 places max) In this course you will be working towards an SQA National Progression Award in Horse Care. This course will be an insight into the basics of horse care, covering aspects of stable management, animal handling and horse care and welfare. This course will not include riding and is for beginners.</p>		<p>Football Academy Become the complete footballer from Grass roots upwards. Playing skills, coaching badges, refereeing classes, ground maintenance and games against other teams will give you so many strengths for a future career and encourage you to aim for the top. All on our new Astro, Fitness suite and Grass pitches. There will be a small Theory unit involved.</p>	
<p>Basketball Academy Learning skills for life and work through the sport of Basketball. Personal playing skills and fitness, refereeing skills, official table skills, Coaching skills and tournament organisation experience. All in our brand new Games hall, Fitness suite, and outdoor courts. Score a 3 pointer and choose Basketball Academy! There will be a small Theory unit involved.</p>		<p>Rugby Academy Try hard and become a confident Rugby player who understands the game from Scrum to line out. Playing skills, coaching badges, refereeing classes, ground maintenance and games against other teams will give you so many strengths for a future career and encourage you to aim for the top. All work will be done on our new Grass rugby pitch, Astro and Fitness suite. There will be a small Theory unit involved.</p>	
<p>Digital Design and App Development The future workplace needs people that can bring creative design to digital solutions. In this elective we will learn the skills of graphic design through the use of creative design software such as Adobe Creative Suite (including Photoshop), Serif Plus and G-Suite. We will look at the App development design process and work towards creating solutions for real world problems.</p>		<p>Construction This elective will be delivered by staff from Edinburgh College and will allow students to learn practical craft skills and work towards achieving a National 3 qualification in this subject.</p>	
<p>Duke of Edinburgh Award</p>		<p>Dance Academy</p>	

<p>This elective will allow you to work towards gaining the Duke of Edinburgh Bronze Award. The award is recognised by universities and employers as evidence of determination, commitment and leadership skills. You will enhance your skill set through four key areas: volunteering, improving your physical fitness, developing social skills and personal interests and finally by undertaking an expedition. The course will give you the opportunity to work with others, learn more about yourself and gain a qualification which you will be able to use on your CV, job, college or university application.</p>		<p>Become a more confident and accomplished Dancer and Choreographer working in our new Dance Studio and Theatre. You will learn technical skills in Jazz, Contemporary, Hip Hop and other styles. You will learn the art of Choreography through widening your experience of different stimulus, Choreographic devices, working in and leading small groups, creating short solos with the focus on Performance building confidence and resilience for the future. Put your best foot forward and choose Dance. There will be a small theory element which will involve researching dance careers, watching and analyzing dance performances looking at the choreography, lighting, music, costumes and stage setting.</p>	
<p>Robotics and Drone Academy You will work with robots, design drones and code devices in this elective. We will look at how devices communicate and connect using the Internet of Things (IOT). In the future IOT devices such as Alexa will transform the way we live, travel and work, be part of it now! We will work towards achieving outcomes from the new Data Science NPA.</p>		<p>Engineering Academy This elective will be delivered by staff from Edinburgh College and will give students an insight into the different types of Engineering that can be studied and the career opportunities that are available as an Engineer. The majority of this course will be delivered in school but there will be opportunities to visit and complete work in the Edinburgh College workshops.</p>	
<p>Go MTB (Mountain Biking) Bikeability Scotland is a cycle training programme designed to give pupils the skills and confidence they need both to cycle safely on the roads, and to encourage them to carry on cycling into adulthood. Pupils will work towards a level 4 bikeability award through Cycling Scotland and build on their off-road qualifications. (max 8 pupils).</p>		<p>Hospitality Develop your practical cookery skills and learn how to plan, prepare and cook healthy dishes to impress your family and friends. There will be an emphasis on developing skills. This popular course has been designed for students with an interest in a career in the Hospitality industry. Chefs work as part of a team in time-bound and often challenging kitchen environments; for example, in schools, hospitals, the Armed Forces, care homes and high street casual dining or pub kitchens. This course gives an insight into this environment.</p>	
<p>Science and Health</p>		<p>Childcare</p>	

<p>In this course you will work towards getting an SQA National Progression Award (NPA) in Science and Health. You will learn about various aspects of biology, chemistry and physics whilst also enhancing your practical laboratory skills in each area. The aim of the course is to investigate how these aspects of science are related to the health sector. You will also develop your communication, ICT, numeracy, team working, problem solving and employability skills whilst building skills that will also help you succeed in sciences in the senior phase.</p>		<p>Develop your Childcare skills and learn how to interact and care for young children through play. Students will have the opportunity to develop skills which are valuable for following a career pathway in Childcare. This is an area of employment which is growing rapidly and offers excellent progression pathways.</p>	
<p>Sound Production Expand your existing instrumental skills by learning the process of recording and editing in a state-of-the-art recording studio with industry-standard software. You will work towards achieving SQA units in Sound Production.</p>		<p>Newbattle Bake-Off The Newbattle Bake-off offers the opportunity to develop your baking skills. Whether you have an interest in following a career in this field, or if you just want to bake for pleasure this is an enjoyable and worthwhile choice. Begin with basic baking techniques and progress to developing more sophisticated baking skills.</p>	
<p>Gardening From planting, digging, and growing your own food, through to planning, watering plants and tidying; gardening helps you learn the importance of being organised, whilst reinforcing empowerment and assertiveness.</p>		<p>John Muir Award Elective This elective will allow you to achieve the nationally recognised John Muir Discover Award. You will find out how to evaluate the local environment, plan for and take action on improving it. You will learn about John Muir (a Scot who set up the National Park system in the USA) and his legacy of environmental conservation. You will share your discoveries and actions with the rest of the school and local community - join in and take part in improving your local area.</p>	
<p>Creative Arts – Drama - Ms Stoney Drama needs performers but there are more options to try besides acting. The Creative Arts Elective will give pupils an opportunity to develop technical theatre skills through exploring lighting fx, sound fx, stage make-up and costume.</p>		<p>Language Ambassadors Great opportunity to learn more about the culture of the language you are learning, testing tapas, watching films in the target language and much more, sampling new languages. You will have the chance to support primary schools in their language learning journey whilst also building on your communication, team work and problem-solving skills.</p>	
<p>Creative Arts – Art & Design</p>		<p>STEAM</p>	

<p>In this course you will have the opportunity to explore different career options within the creative industries, such as make-up design, photography, and animation. You will develop your skills in researching and developing an idea and media handling. You will also have the opportunity to use relevant technology and materials, such as photoshop, face paint/special effects make-up and animation apps.</p>		<p>The S2 CDT STEAM elective will focus on Raspberry Pi and VEX robotics. Pupils will learn how to program the tiny computer that is Raspberry Pi using online software and additional hardware before stepping up to VEX robotics. This brings STEM skills to life by tasking teams of students with designing and building a robot to play against other teams in a game-based engineering challenge. Classroom STEM concepts are put to the test as students learn lifelong skills in teamwork, leadership, communications, and more. Tournaments are held year-round at the regional, state, and national levels and culminate at the VEX Robotics World Championship each April!</p>	
<p>Water polo and Conditioning This option is for anyone who has an interest in learning to play water polo. Included in this elective will be swimming development; basic water polo skills leading to more complex movements in the water to enable speed and strength; gym sessions to work on strength and stamina. This will be delivered by UKCC level 2 club and national team coaches including international guest coaches from both swimming and polo backgrounds, nutritionists from Edinburgh University and many current Senior men’s team athletes. This would be excellent for any pupil wishing to play water polo, teach (or coach) swimming, work towards the NPLQ lifeguarding qualification, or, for anyone wishing to get involved in a team sport that promotes building strength, speed and stamina.</p>		<p>Media This course is designed for pupils interested in a career in the media: comic books, film, advertising computer games, radio, websites, posters etc. Pupils will analyse a range of media texts learning industry specific terminology and skills whilst gaining an SQA qualification. Pupils will also get to create their own media texts using the knowledge they gain from the analysis.</p>
