

Environmental Biology- Homework 4

Your task is to become a journalist for the day! You should research and write a **newspaper article** on an animal that is at risk of becoming extinct. Try and find one that has not been talked about in class.

Your article should take up around half a page of A4 paper. You should be prepared to present your information to the class if your teacher asks you to. You can use the Internet or books from the library to do your research.

Make sure you include the following information in your article to gain marks.

- 1) Give your article an interesting title that would encourage people to read it. (1 mark)
- 2) What is the animal called? (1 mark)
- 3) Where does the animal live? (1 mark)
- 4) Why is the animal at risk of becoming extinct? (1 mark)
- 5) Include a picture/drawing of the animal. (1 mark)
- 6) What two things could be done to prevent the animal from becoming extinct? (2 marks)
- 7) Give three reasons why it is extremely important that the animal does not become extinct. (3 marks)

Total: 10 marks
