Lifelong
Learning
Programme

Developing an EU
standardised approach to
Vocational Qualifications
in **Healthcare Waste
Management**

Project

The project aims to provide a **unified** approach to the development of **National Occupational Standards** and **Vocational Educational Training Programmes** for **Healthcare Waste Management** across the **EU Member States**.

This will be achieved through the development of a new healthcare waste management **qualification framework**, and **e-learning platform**.

Key Outputs

- An assessment of the current VET availability across the EU countries, represented by the partner countries.
- Assessment of the core skills requirements for the role of healthcare waste managers
- The development of a standardised EU vocational training programme for healthcare waste managers.
- The development of associated training materials to underpin the training programme.
- The development of an e-learning platform to facilitate the remote deliver of the training programme.
- An EU wide network of healthcare waste management professionals will be established

The project has a strong team, comprising of 12 partners, representing **11 European countries** and **two pan European industry associations**.

The partnership group represents a **broad range** of stakeholders with a **high level of technical expertise** from **both the state and private** healthcare sectors.

In addition the project partnership includes stakeholders representing **both healthcare waste managers** and **healthcare providers** as well as a strong representation from **vocational education training**.

How to register

The project runs from **1st January 2014** until **31st December 2016**.

To **register** with the project dissemination network please contact **Julie Peer** by email: **info@hcwm.eu**
