

Relational Pedagogy in virtual learning environments: a study of online approaches to the development of Communities of Enquiry in Higher Education

Stephen Powell and Orlagh McCabe

Manchester Metropolitan University

- This paper analyses the experiences of academic staff at a large Northwest institution in making the transition to fully online provision.
- Research sought to identify the limitations of a virtual environment on tutor's ability to develop and sustain learning communities with their learners.

Online, Block Teaching: Design Choices

Relational Pedagogy

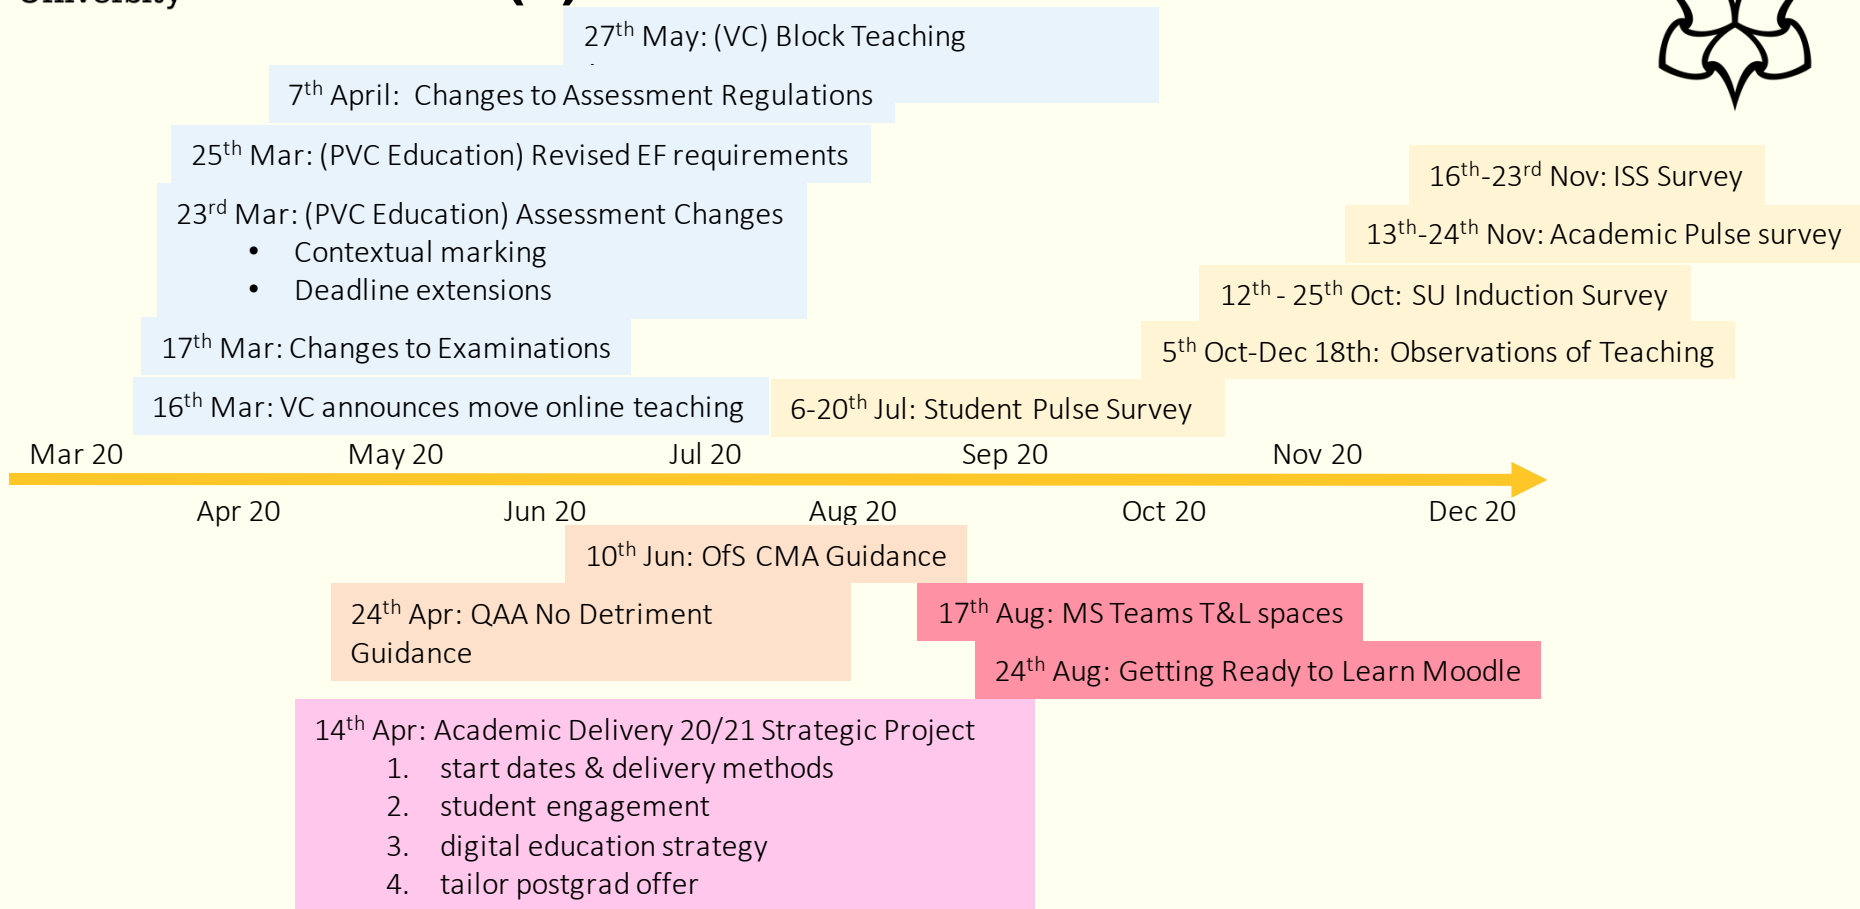

- Murphy and Brown (2012) suggests that *‘a relationally focused approach takes seriously questions of trust, recognition and respect which lie at the heart of the students experience’*
- Relational pedagogy is broadly premised on the idea that individuals are not the superlative, unit of analysis for understanding human phenomena (Gergen, 2009).
- Relational pedagogy contests an individualised approach to knowledge acquisition, yet acknowledges the value that ‘self’ and ‘other’ recognition can have in this process.

Soft Systems Methodology (purpose and effectiveness)

Soft Systems Methodology (SSM) is a method to structure complex problems and to develop desirable and feasible changes through an accommodation of views of group of people.

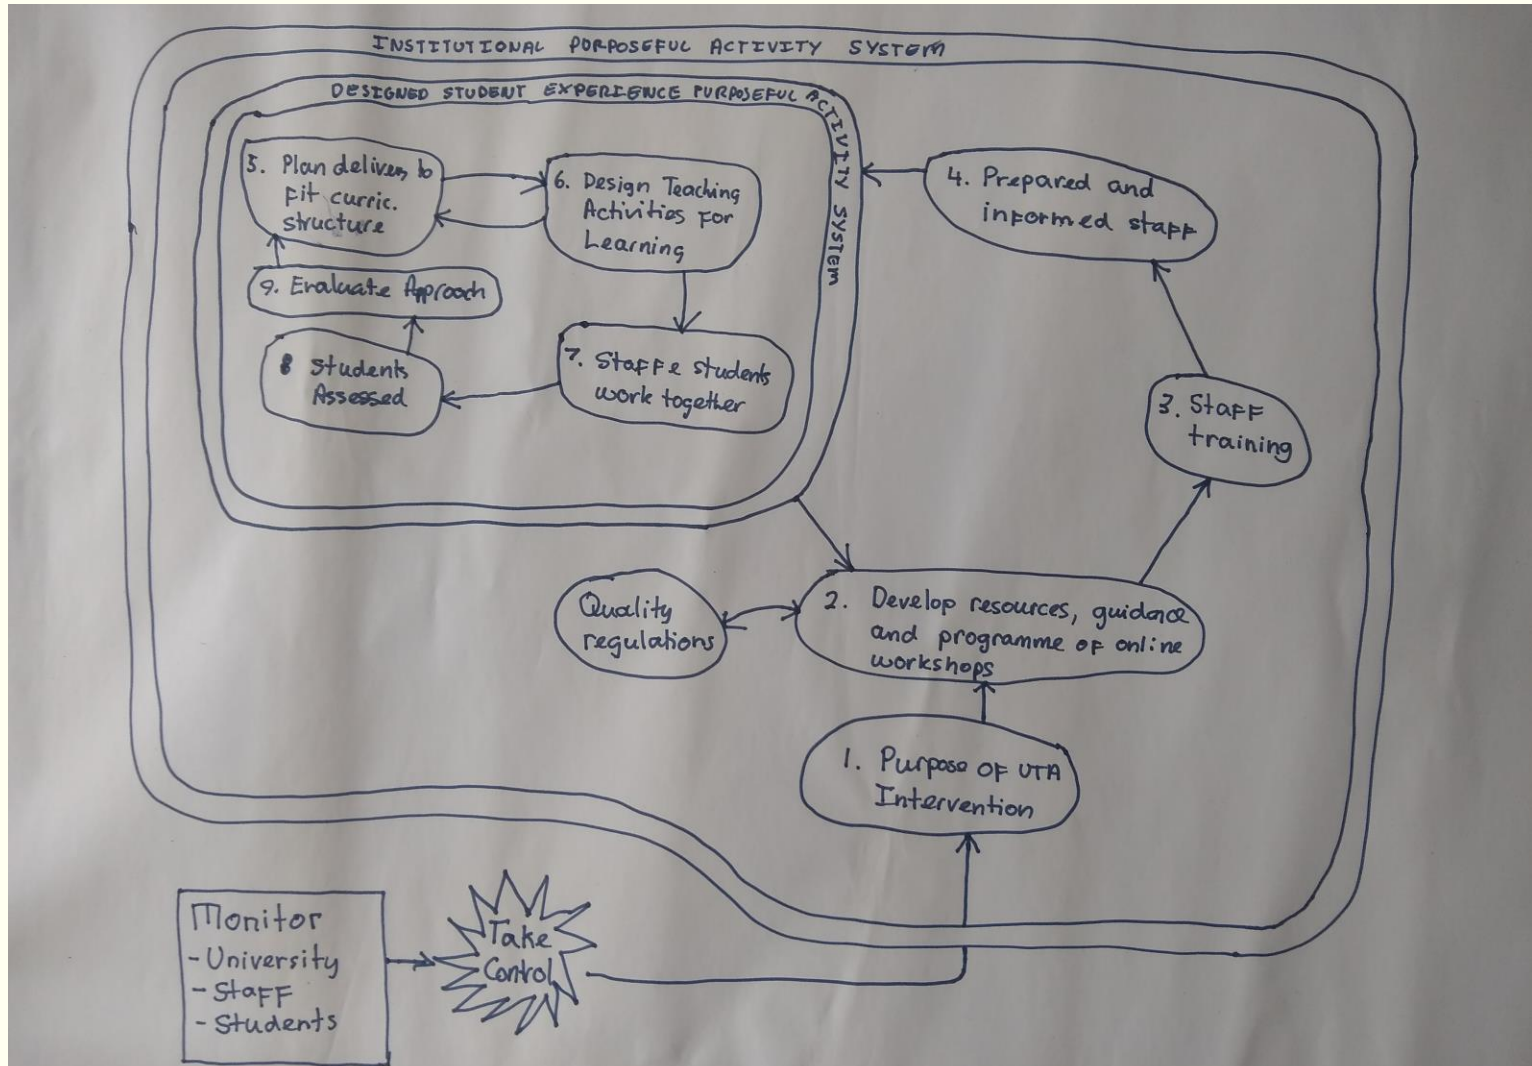

(2) Root definition (purpose of the system in focus)

P (what) – Q (how) – R (why)

Support staff to develop synchronous and asynchronous online teaching activities, which place the learning community at its centre using active learning strategies, to promote deeper learning and engagement

(3) Purposeful Activity Model

Manchester Metropolitan University.
Academic Pulse Report: 13th -24th Nov

Participation rates by Faculty

	Responses	Headcount	Responses %
Arts & Humanities	167	545	31%
Business & Law	143	380	38%
Education	39	142	27%
HPSC	36	247	15%
Science and Engineering	117	358	33%

Q13: I have managed to develop a strong sense of community and positive relationships teaching student

Q06: In my subject area, block teaching: works well for students/is ineffective for students

Q10: On the whole, my students have engaged with my teaching

The Data

- Reflections are based on the preliminary findings from a questionnaire disseminated to academic staff at a large Northwest University.
- 71% of staff said they had experienced difficulties in creating a sense of community with learners.

• Key Themes

Time Constraints

Connecting with Learners

New ways of teaching

Learning new Systems/tech

Conclusions – We have Observed

- Innovation
- Creative Approaches
- 'Active Learning strategies'
- Empowerment and Increased confidence

- **What's Next...**
