*Sociologies in Dialogue* brings together expert contributions from international scholars, who reflect on the importance of collaboration between diverse sociological perspectives to enhance our understanding of the role of sociology as an academic discipline, and as a vehicle for social change.

By exploring the distinctive practices and research of a range of sociologists, the book shows how an open dialogue between sociologists is critical to addressing major sociological issues across the globe such as inequality and ethnocentrism, and challenging the hierarchies of knowledge production and circulation. Contributors also discuss novel strands in theory and methodology such as multicultural sociology, cosmopolitanism, and multiple modernities.

An important contribution for researchers and students interested in global sociology, sociological theories and methodologies.
